

MILLER HYBRIDS

2027

PRODUCT GUIDE

Build on Gratitude.

Each day we ask, "what's next" as we build on what we currently have and strive to find new and better solutions to meet the needs of our customers.

This year Miller Hybrids is entering our 20th year of seed sales. The perseverance and hard work of the Miller Hybrids team and the success our customers has allowed this continual growth. We are grateful to hear stories of positive results from those who have correctly used high performing Miller Hybrids seed on their farms!

The Miller Hybrids story is filled with gratitude for the many contributions of our high quality employees, dealers, research and production partners, agronomists, and most of all, our customers who trust our team to provide seed solutions for their farms.

The customer's needs drive our research. That's why it's conducted under stressful conditions like corn-on-corn, sandy soils, gumbo soils, and regenerative agriculture environments. We mean it when we say, "We are selecting corn for maximum farm average ROI, rather than only for perfect soils."

Thank you for considering Miller Hybrids as your seed partner to help you maximize the Return on Investment (ROI) on your farm!

Best Regards and deep-felt gratitude,

Bob & Pam Miller

OWNER, MILLER HYBRIDS

Bob & Pam Miller.

Early Pay Discount

Take advantage of early pay discounts! This discount will be deducted after all other discounts on retail priced units only. Payments must be received by Miller Hybrids within the discount window to qualify. Check with your Miller Hybrids representative today to learn how you can save. Additional discounts apply to any order placed before September 30.

Volume Discounts

Receive a volume discount when you reach quantity platforms with Miller Hybrids. Volume discounts will be calculated based on total seed purchased and used. Corn volume can increase soybean discounts. Returned seed may impact volume discounts and will be credited after recalculating discounts on the final quantity platform.

Research at Miller Hybrids.

Developing corn hybrids for farm averages.

Miller Hybrids uses a completely unique approach to developing hybrids using pure-stand testing starting in the earliest stages of development when genetic variation is maximized.

By using 8-row plots that are 40 feet long and harvesting the middle 4 rows, we let God select the most efficient plant style to maximize yield. This pure-stand testing approach has led to some smaller, upright plant styles that let maximum light reach the center of the canopy, where the most efficient leaves reside to feed the ear. This style also tends to enhance standability and provide cooler canopies under high heat. Smaller high-boy sprayers can be used to apply fungicides for more complete whole plant coverage, due to the smaller upright plants. The 8-row plots allow harvesting usable yield and standability data, even following derecho wind events, because the neighbor hybrid will not compromise at least 4-rows of each plot, while standard 2 and 4-row plots get discarded because of the inter plot standability issues.

Miller Hybrids also has every hybrid tested in corn-on-corn fields annually as well as one or two locations in a regenerative ag field. We test on sandy soil and gumbo soil, as well, to ensure that we identify hybrids for the average farmer, rather than simply to identify hybrids under more perfect soils.

> *"We are developing hybrids to maximize the Return-On-Investment for farmers."*

Replant Policy.

Shieldcoat™ is our proprietary seed treatment mixture. Different hybrids or soybean varieties can be given different treatments, however all treatment mixes are comprised of industry leading fungicides and insecticides to provide enhanced protection to the seed and seedling during these vulnerable stages.

> **All seed treated with SHIELDCoat™ can qualify for 100% replant incentives. Miller Hybrids provides 100% replant on treated seed with poor emergence and 50% of retail for other replant needs.**

Ask your dealer or DSM to learn more.

M86-26 GTA

AgrisureGT

86 DAY

POPULATION DENSITY (1000S/ACRE)

WEED CONTROL: Glyphosate Tolerant

PLANT TYPE

Height	**Med-Tall**
Ear Height	**Med**
Ear Flex	**Semi-Flex**

SOIL PRODUCTIVITY

KEY HIGHLIGHTS

- Agrisure Artesian hybrid with nice yield
- Excellent Silage potential
- Excels in average to stress prone fields
- Outstanding roots and strong stalks

M91-23 V: GTLL

Viptera
Agrisure GT/LL

91 DAY

POPULATION DENSITY (1000S/ACRE)

WEED CONTROL: Glyphosate, Glufosinate Tolerant

PLANT TYPE

Height	**Med-Tall**
Ear Height	**Med**
Ear Flex	**Semi-Flex**

SOIL PRODUCTIVITY

LOW MED HIGH

KEY HIGHLIGHTS

- Top-end yield with Artesian® drought tolerance
- Very Good Goss's Wilt and NCLB
- Works well across all plant populations
- Very Good Stalks
- Excellent seedling vigor and emergence

M92-68 V

Viptera

92 DAY

POPULATION DENSITY (1000S/ACRE)

	FAIR (1) — EXCELLENT (9)
Stalk Strength	8.0
Root Strength	7.5
Staygreen	7.5
Drought Tolerance	8.0
Seedling Vigor	8.0
Silage Quality	8.0
Silage Quantity	8.0
Drydown	7.5
Test Weight	8.0

WEED CONTROL: Glyphosate, Glufosinate Tolerant

PLANT TYPE

Height	**Med-Tall**
Ear Height	**Med-High**
Ear Flex	**Semi-Flex**

SOIL PRODUCTIVITY

LOW — MED — HIGH

KEY HIGHLIGHTS

- Excellent farm average yield
- Performs at lower densities well
- Very good Tar Spot and Goss's Wilt tolerance
- Moves North well with strong stalks
- Excellent seedling vigor

RX0961 G

Roundup Ready 2 CORN

96 DAY

POPULATION DENSITY (1000S/ACRE)

	FAIR (1) — EXCELLENT (9)
Stalk Strength	7.5
Root Strength	7.5
Staygreen	7.5
Drought Tolerance	8.5
Seedling Vigor	7.0
Silage Quality	8.0
Silage Quantity	7.0
Drydown	7.5
Test Weight	7.5

WEED CONTROL: Glyphosate Tolerant

PLANT TYPE

Height	**Med-Short**
Ear Height	**Med**
Ear Flex	**Semi-Det**

SOIL PRODUCTIVITY

LOW — MED — HIGH

KEY HIGHLIGHTS

- Very consistent yields and high farm averages
- Very Good Stalks
- Good drought tolerance
- Handles all soil types
- Medium sized healthy plant
- Works well across all plant populations

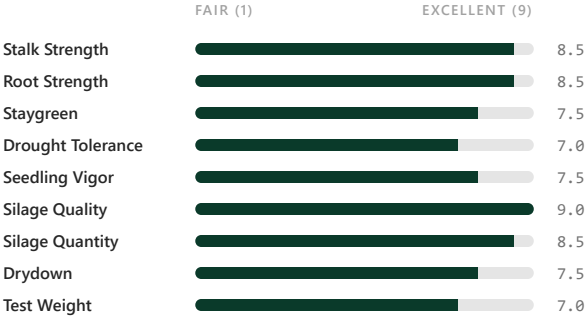

M96-37 DV

Duracade Viptera

96 DAY

POPULATION DENSITY (1000S/ACRE)

WEED CONTROL: Glyphosate, Glufosinate Tolerant

PLANT TYPE

Height	**Med-Tall**
Ear Height	**Med-High**
Ear Flex	**Semi-Flex**

SOIL PRODUCTIVITY

KEY HIGHLIGHTS

- Excellent Roots and Stalks
- Very consistent performance across soil types
- Broad geographic adaptation

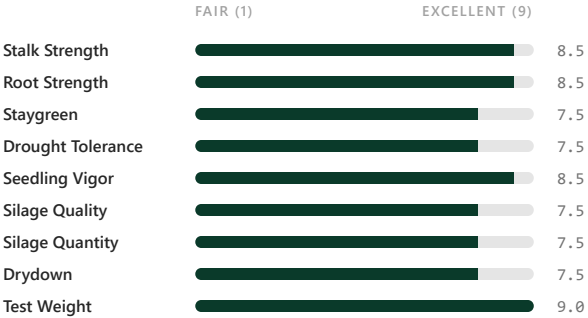

RX97-13 VT2P RIB

VTDoublePRO RIB COMPLETE

97 DAY

POPULATION DENSITY (1000S/ACRE)

WEED CONTROL: Glyphosate Tolerant

PLANT TYPE

Height	**Med-Tall**
Ear Height	**Med**
Ear Flex	**Flex**

SOIL PRODUCTIVITY

KEY HIGHLIGHTS

- Consistent high yields on rotated ground
- Tough hybrid with excellent grain quality
- Excellent seedling vigor
- Very good roots and stalks
- Responds to fungicide but great Goss's rating

WEED CONTROL: Glyphosate, Glufosinate Tolerant

PLANT TYPE

Height	**Med-Tall**
Ear Height	**Med**
Ear Flex	**Semi-Det**

SOIL PRODUCTIVITY

LOW — MED — HIGH

KEY HIGHLIGHTS

- Great farm Average Yield
- Excellent test weight and grain quality
- Very good Tar Spot and Goss's Wilt tolerance
- Excellent stalks and good roots
- Great silage option

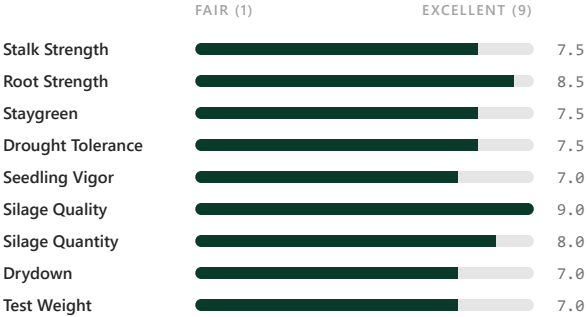

M97-43 PC

POWERCORE Enlist REFUGE ADVANCED

97 DAY

POPULATION DENSITY (1000S/ACRE)

WEED CONTROL: Glyphosate, Glufosinate, Enlist® Tolerant

PLANT TYPE

Height	**Med-Tall**
Ear Height	**Med**
Ear Flex	**Semi-Flex**

SOIL PRODUCTIVITY

KEY HIGHLIGHTS

- Excellent tolerance to Tar Spot
- Likes fungicide & has good agronomics
- Best on better soils with medium to high populations
- Nice harvest appearance and stalks

M98-00 AA

Agrisure Above

98 DAY

POPULATION DENSITY (1000S/ACRE)

WEED CONTROL: Glyphosate, Glufosinate Tolerant

PLANT TYPE

Height	**Med**
Ear Height	**Med**
Ear Flex	**Semi-Flex**

SOIL PRODUCTIVITY

KEY HIGHLIGHTS

- Excellent yield for Maturity
- Excellent roots and good stalks
- Great performance across varying soils and geographies
- Medium size with upright leaf type
- Very good grain quality
- Artesian drought tolerance

M00-44 DS

Durastak

100 DAY

POPULATION DENSITY (1000S/ACRE)

Bayer is a member of Excellence Through Stewardship® (ETS). Bayer products are commercialized in accordance with ETS Product Launch Stewardship Guidance, and in compliance with Bayer's Policy for Commercialization of Biotechnology-Derived Plant Products in Commodity Crops. Commercialized products have been approved for import into key export markets with functioning regulatory systems. Any crop or material produced from this product can only be exported to, or used, processed or sold in countries where all applicable regulatory approvals have been granted. It is a violation of national and international law to move material containing biotech traits across boundaries into nations where import is not permitted. Growers should talk to their grain handler or product purchaser to confirm their buying position for this product. Excellence Through Stewardship® is a registered trademark of Excellence Through Stewardship.

ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS.

B.t. products may not yet be registered in all states. Check with your seed brand representative for the registration status in your state.

Refuge seed may not always contain the DroughtGard® trait. IMPORTANT IRM INFORMATION: Certain products are sold as RIB Complete® corn blend products, and do not require the planting of a structured refuge except in the Cotton-Growing Area where corn earworm is a significant pest. Products sold without refuge in the bag (non-RIB Complete) require the planting of a structured refuge. See the IRM/Grower Guide for additional information. Always read and follow IRM requirements.

Roundup Ready® Technology contains genes that confer tolerance to glyphosate. Roundup Ready® 2 Technology contains genes that confer tolerance to glyphosate. Plants that are not tolerant to glyphosate may be damaged or killed if exposed to those herbicides. Insect control technology provided by Vip3A is utilized under license from Syngenta Crop Protection AG. Herculex® is a registered trademark of Dow AgroSciences LLC. Agrisure Viptera® is a registered trademark of a Syngenta group company. Respect the Refuge and Corn Design® and Respect the Refuge® are registered trademarks of National Corn Growers Association. Acceleron®, DroughtGard®, RIB Complete®, Roundup Ready 2 Technology and Design®, Roundup Ready®, SmartStax®, Trecepta®, and VT Double PRO® are trademarks of Bayer Group.

Legal.

Seeds containing the PowerCore® Enlist®, PowerCore® Enlist® Refuge Advanced®, Enlist® Corn - REFUGE and Enlist E3® traits are protected under one or more U.S. patents which can be found at www.traitstewardship.com. The purchase of this trait-ed seed includes a limited license to produce a single crop in the United States. The use of seed from such a crop and/or the progeny thereof for propagation or seed multiplication or for production or development of a hybrid or different variety of seed is strictly prohibited. You acknowledge and agree to be bound by the terms and conditions of the following documents in effect at the time of planting of this seed: (i) the Corteva Agriscience Technology Use Agreement and (ii) the Product Use Guides for all technologies in this seed, including the Herbicide Resistance Management (HRM), and Use requirements.

To plant PowerCore Enlist, PowerCore Enlist Refuge Advanced, Enlist Corn - REFUGE and Enlist E3 seed, you must have a limited license from Corteva Agriscience (or other appropriate affiliates). In consideration of the foregoing, Corteva Agriscience grants to the Grower a limited license to use its technology to produce only a single commercial crop in the United States under the terms and conditions set forth in the Technology Use Agreement in effect at the time of planting of this seed.

Enlist E3® soybean seeds containing the Enlist® trait can only be used to plant a single commercial crop. It is unlawful to save and replant Enlist E3 soybeans. Additional information and limitations on the use of these products are provided in the Corteva Agriscience Technology Use Agreement and Enlist® Soybean Product Use Guide. U.S. patents for Corteva Agriscience technologies can be found at www.corteva.us/Resources/trait-stewardship.html.

IRM - Properly managing trait technology is key to preserving it as a long term crop protection tool. Growers who fail to comply with IRM requirements risk losing access to this product. To help preserve the effectiveness of B.t. corn technologies, growers planting B.t. corn technologies are required to follow an IRM Plan. Consult the Corn Product Use Guide for appropriate refuge configuration options. Before opening a bag of seed, be sure to read, understand and accept the stewardship requirements, including applicable refuge requirements for insect resistance management, for the biotechnology traits expressed in the seed as set forth in the Technology Use Agreement and Product Use Guide. By opening and using a bag of seed, you are reaffirming your obligation to comply with the most recent stewardship requirements. For complete details on IRM requirements for hybrids with Bt technology, including refuge examples and important information on the use of insecticides on refuge and Bt corn acres, please consult appropriate Product Use Guide. Go to www.corteva.us/Resources/trait-stewardship.html to download the latest Corteva Agriscience Corn Product Use Guide.

Corteva Agriscience is a member of Excellence Through Stewardship® (ETS). Corteva Agriscience products are commercialized in accordance with ETS Product Launch Stewardship Guidance and in compliance with the Corteva Agriscience policies regarding stewardship of those products. In line with these guidelines, our product launch process for responsible launches of new products includes a longstanding process to evaluate export market information, value chain consultations, and regulatory functionality. Growers and end-users must take all steps within their control to follow appropriate stewardship requirements and confirm their buyer's acceptance of the grain or other material being purchased. For more detailed information on the status of a trait or stack, please visit www.biotradestatus.com. Excellence Through Stewardship® is a registered trademark of Global Stewardship Group.

Following burndown, Enlist Duo® and Enlist One® herbicides with Colex-D® technology are the only herbicides containing 2,4-D that are authorized for preemergence and postemergence use with Enlist® crops. Consult Enlist® herbicide labels for weed species controlled. Enlist Duo and Enlist One herbicides are not registered for use or sale in all states and counties; are not registered in AK, CA, CT, HI, ID, MA, ME, MT, NH, NV, OR, RI, UT, VT, WA and WY; and have additional subcounty restrictions in AL, GA, TN and TX, while existing county restrictions still remain in FL. All users must check "Bulletins Live! Two" no earlier than six months before using Enlist One or Enlist Duo. To obtain "Bulletins," consult epa.gov/espp/, call 1-844-447-3813, or email ESPP@epa.gov. You must use the "Bulletin" valid for the month and state and county in which Enlist One or Enlist Duo are being applied. Contact your state pesticide regulatory agency if you have questions about the registration status of Enlist® herbicides in your area. ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS. IT IS A VIOLATION OF FEDERAL AND STATE LAW TO USE ANY PESTICIDE PRODUCT OTHER THAN IN ACCORDANCE WITH ITS LABELING. ONLY USE FORMULATIONS THAT ARE SPECIFICALLY LABELED FOR SUCH USE IN THE STATE OF APPLICATION. USE OF PESTICIDE PRODUCTS, INCLUDING, WITHOUT LIMITATION, 2,4-D-CONTAINING PRODUCTS NOT AUTHORIZED FOR USE WITH ENLIST CORN AND SOYBEANS, MAY RESULT IN OFF-TARGET DAMAGE TO SENSITIVE CROPS/AREAS AND/OR SUSCEPTIBLE PLANTS, IN ADDITION TO CIVIL AND/OR CRIMINAL PENALTIES. Additional product-specific stewardship requirements for Enlist crops, including the Enlist Product Use Guide, can be found at www.traitstewardship.com.

POWERCORE® multi-event technology developed by Corteva Agriscience LLC and Monsanto. LibertyLink® and the Water Droplet Design are registered trademarks of BASF. PowerCore® and Roundup Ready® are registered trademarks of Bayer Group. Always follow IRM, grain marketing and all other stewardship practices and pesticide label directions. B.t. products may not yet be registered in all states. Check with your seed representative for the registration status in your state. The transgenic soybean event in Enlist E3® soybeans is jointly developed and owned by Corteva Agriscience and M.S. Technologies, L.L.C. ™ ® Trademarks of Corteva Agriscience and its affiliated companies.

"I have been all Miller Hybrids since 2010. I like the fact that I can talk to the plant breeder when I have questions about a hybrid for a specific soil type and he also happens to be the owner of the company. Rarely does the operator have those options to gather information."

DAVID GRAYBILL
Freeport, IL

When you choose to work with Miller Hybrids, you are choosing to work with a small, family owned and operated business. Miller Hybrids takes on the same challenges as the big Ag industry, but focus on pleasing its customers, not shareholders. You are choosing to promote local community growth by keeping your dollars in the Midwest, where your grandchildren will benefit.

R = Resistant MR = Moderate Resistance HR = High Resistance

Really great Alfalfa!! I received a lot of compliments from neighbors and friends. I took good care of my Profusion and it paid great dividends! It was definitely one of the best alfalfa crops I've raised. I was very pleased with my stand, and harvest tonnage.

What Drives Miller Hybrids?

Innovation

Miller Hybrids strives to have the most innovative testing program in the seed industry, with the goal of finding corn hybrids that work well on your best soils, while also developing hybrids to elevate the performance on your most challenging soils. We are the only company globally that test all stages of hybrids in "pure stand" (8-row by 40' plots with the middle 4 rows used for data) in a regenerative ag plot and corn-on-corn. We also test on sandy soils and gumbo soils, while the industry chooses to test mostly in ideal soils following soybeans. We have usable data for standability from our 8-row plots, even following extreme wind events, while most competitor's testing programs with 2 and 4-row plots, have unusable data due to inter-plot competition. Our research program allows us to more accurately discover stable hybrids, rather than hybrids designed for only the best soils.

> *"I buy my seed based on performance, value and the agronomic recommendations from a trustworthy local dealer. My Miller Hybrids products have defined their value on my farm. I'm very impressed with my yields and product performance, and am excited about the new products each year."*

Partnerships

FOR MUTUAL SUCCESS

We offer proven corn, soybeans and alfalfa to provide solutions for each customer field and specific farming operation. We provide Miller Hybrids® branded organic and conventional corn or soybeans as well as varieties containing Agrisure® and Powercore® traits and we distribute Bayer® Genuity® traits for our partner, Roeschley Hybrids™. This diverse set of proven genetics and traits, priced fairly, allows us to partner with you to provide all your seed needs, regardless of how you farm. The innovative testing program we run allows us to understand what genetics and traits best fit your seed needs, one field at a time. Our dedicated staff will respond in a timely and professional way to provide proven seed solutions for your enhanced profitability!

Sustainability

SUCCESS TODAY AND INTO THE FUTURE

Continually observing, listening and implementing improvements that increase your farming operation's ROI will sustain us. By always putting our customer needs first in all we do and by treating our customers, employees, vendors, communities and families fairly and with respect and integrity, we will ensure viability for the future. If your return on investment is maximized, that will allow you, and your future generations as well as Miller Hybrids, a successful future as partners in feeding the world.
